## HÜRNER HWT 160-M

The practical HWT 160-M is a plastic butt-welding system for jointing PE, PP, PVDF pipes and fittings from O.D. 40 - 160 mm. This tremendously mobile next-generation welding machine for on-site and in-shop applications is extremely versatile and especially suited for sanitary installations, drain piping, and pressure pipes for water conveyance as well as roof drains and chimney refurbishing systems.

The machine ships with a sturdy stand, an electrical facing tool, heating element, and all reducer inserts and arrives plug-and-play, fully installed.

Its clamps swivel by up to 15 degrees allowing segmented bend welding for O.D. 40 - 160 mm. The heating element can be removed from the machine, for use, if needed, next to it, e.g., with HÜRNER's dedicated support stand.
